Address

Erbil, Soran, Mergasor

Skills

- Work group

Language

- Kurdish (Native)
- English (Intermediate)

About

Hello! My name is Barzan, and I'm a 12th-grade student with a passion for front-end web development. Over the past year, I have gained valuable experience in web development, honing my skills in HTML, CSS, Tailwind CSS, JavaScript, React JS, and Firebase. My journey into web development began with a curiosity about how websites work and a desire to create visually appealing and functional web applications. I enjoy turning creative ideas into reality through code. With HTML and CSS, I build the structure and style of web pages, while Tailwind CSS allows me to streamline my workflow and create beautiful designs efficiently. JavaScript adds interactivity and dynamic functionality to my projects, and React JS enables me to build complex and responsive user interfaces with ease. Firebase plays a crucial role in my development process, providing a robust backend service for authentication, database management, and hosting. It helps me create full-fledged web applications with real-time data synchronization and secure user authentication. As I continue my studies and enhance my skills, I look forward to taking on new challenges and exploring more advanced topics in web development. I am eager to contribute to exciting projects and collaborate with others in the tech community.
